- 3100 Lot of (10) Counterstamps on U.S. Large Cents.** The counterstamps all consist of one, two, or three letters in incuse rectangular punches, often with serrated borders. These stamps are the type often used by early 19th-century craftsmen to identify their wares. None of the marks were found listed in Brunk or Rulau, and it's possible that some may be unique. The listings are arranged alphabetically by the last letter in the mark. Included are: J.H.C on 1820 cent; G.H.+ and floral motif on 18—Matron Head cent; M on 1802 cent; B.B.S on 1797 cent; J:C:S on worn Matron Head cent; R.S on 1798 cent; W.S on 1798 cent; S:T on 1803 cent; H.W on 1802 cent; and W:W on worn (Classic Head?) cent. Host coins grade average Poor to VG. (As specialists know, for counterstamps the more worn the host coin is, the clearer the counterstamp is apt to be. Many counterstampers deliberately selected well-worn coins for counterstamping, a situation quite opposite that of regular numismatics.)
- 3101 Lot of (30) Counterstamps on U.S. Large Cents.** These pieces consist mostly of random stamped letters or numerals, while others have multiple letters or numerals. Some may have been stamped with logotypes. A few were probably intended as service checks used in restaurants where meals would be received by the customer at the counter after payment had been tendered. In two or three cases letters were crudely engraved rather than stamped. Host coins range from Poor to VF or better. Dates range from 1798 up into the 1850s. Several different host types are present including both Draped Bust and Classic Head designs. In-person examination is recommended to prospective bidders. *This is a must see, sold as is, no return lot.*

Incused rectangular punches were commonly used by manufacturers of hand tools, agricultural implements and the like, to mark their products made of metal or of hard wood. Over a period of time many once-unattributed marks have been identified, a field that has many interesting challenges. *This is a must see, sold as is, no return lot.*

Wing Civil War token, NY-10H-7a, with WING visible on obverse and [U]NIO[N] [FL]OU[R] on reverse. This last piece was probably made as a novelty to befuddle a novice collector. Grades of host coins range from Poor to VF.
- 3107 Lot of (10) Counterstamps on U.S. Large Cents.** These stamps are likely those of manufacturers and merchants. THE RAYMOND W. DILLARD COLLECTION OF ELONGATED COINS

Stack's Bowers Galleries is proud to offer selections from the Raymond W. Dillard Collection, a remarkable selection of elongated coins. A collector of U.S., Canadian and Mexican coins since the 1960s, Ray's focus eventually turned to elongated coins, and over the years he carefully built his collection by buying individual rarities as well as entire collections when it suited him. Thirty years later, he has amassed what is one of the most, if not the most, significant collections of its kind. The selections offered below represents an excellent opportunity to acquire a large and diverse assortment of these specialty items — an opportunity that is seldom encountered.
