The present example is found with still illuminating detail of the early BWC design, with only a few minor restorations in the margins observed under heavy scrutiny. Incredible PMG Gem Uncirculated 66 EPQ 1918 1,000 Markkaa

FINLAND

54 **Finlands Bank. 1000 Markkaa, 1918. P-41.** This note is one that will certainly be a highlight of the world banknote section, as it is a type seldom seen in any state of preservation. It is the highest denomination for the 1918 issue and is just the second we have had the pleasure to handle. The large format design is seen with an intricate engraving, featuring two men standing holding a caduceus at center, with large tree in the background. Back with ornate bordering design showing text within, and large central vignette of tree leaves with trunk at center and island in background. The overall quality is stunning with perfectly original paper throughout, and centering and margins that help confirm the lofty grade assigned by PMG. Bank name repeated continuously in under-printing. Back design shares a similar layout to face ornate border in brown and light brown under-prints. Simply a sensational item, and the first we have seen or handled for the design. Certainly a note which will be on people's radar. **PMG Gem Uncirculated 66 EPQ. ..... $2500-$3500**

GABON

High Grade Silver Octodrachm of the Bisaltae

MACEDON

254 **Macedonian Tribes. Bisaltae. AR Octodrachm (28.94 gms), ca. 470 B.C.** cf.Svornos-pl. XI,1-3. Bridled horse walking right, nude warrior standing right in background holding spears, native inscription around; Reverse: Shallow quadripartite incuse square. Good artistic style for type as the engraving was executed in a semi-realistic manner. Many Octodrachms in this series are engraved in a manner where the standing figure appears disjointed at the waist, with the legs engraved disproportionately ahead of the torso. This was likely done as the placement of the horses hind legs were located in the same positioning. The piece offered here was engraved by a more skilled artist who was able to correctly position the warriors legs with the horses allowing for the correct contrast and a feel of depth. These large Macedonian issues were likely produced in a different manner than that of most conventional ancient coinage. The Octodrachms of the Bisaltae as well as the Octodrachms of Alexander I and the Dodecadrachms of the Derrones were seemingly produced in a two part process. Flattening on the reverse would suggest the coins were struck with dies individually, rather than at the same time. The reasoning for this is most likely due to the coins massive size. The reverse design was the first to be struck onto the planchet, the coin would then be turned over and struck with the obverse design. Evidence of this can be seen on the coin offered here as there is some flattening to the inside of the incuse square. The reverse incuse design featured on this coinage would be purely ornamental rather than a function of pushing metal into the obverse die. The Dodecadrachms of the Derrones are perhaps the best example of this double striking method, as they display a Triskeles on the reverse which is predominantly found flattened or mashed as a result of the secondary strike. Well struck on a problem free planchet of good sound metal. **CHOICE EXTREMELY FINE.....$12,000-$16,000**

Head of Heracles right wearing lion's scalp; Reverse: Zeus enthroned left holding scepter and eagle, rose in left field. It was in Memphis at the Temple of Ptah that Alexander was crowned as Pharaoh. Memphis is the only mint if all of Egypt to issue Tetradrachms in the name of Alexander, for that matter it is one of only two mints in all of Africa to do so, the second being Cyrene. Upon Alexander's death, his body was of course brought to Memphis by Ptolemy I. It was custom for the Macedonian king to attain their right to the throne through burial of their predecessor. This is one of the ways that Ptolemy ensured that Egypt was his. Alexander's body was later moved to Alexandria under Ptolemy II. An exceptional example of one of the most sought after Tetradrachms of Alexander the Great. Boldly struck on a large round planchet in high relief. Fine artistic style. TIME OF TIBERIUS

385 **AE Tessera (Erotic Spintra) (4.57 gms).** cf.Simonetta Riva-Obv. Scene 9, Rev. Scene 6D; Buttrey-Obv. 11/XV. Erotic scene, man kneeling between the legs of his companion, who with slightly erect torso lies on her back against a cushion atop a low couch, curtains hanging from table and above the scene, slight linear border around; Reverse: Roman numeral "XV" (for fifteen) within dotted border, wreath around. Well rounded. A pleasing cocoa brown obverse with minor verdigris and slight orange highlights. The reverse has a slightly higher proportion of verdigris or deposits but it has a nice strike.

These small bronze tokens were created, according to their obverse designs and scholarly research, for use as payment in brothels. Some theories also present the notion that they were used as gaming tokens. Their use in brothels seems supported by the ancient roman historian Suetonius (most famous for his biography on the twelve Caesars), who states that bringing a coin or other object with the effigy of the Roman Emperor into a brothel was an act of treason punishable by law. These licentious tokens seem a good work-around to using common coinage when visiting an erotic establishment. The obverse design mirrors that of the Erotic Frescoes found on the wall of the brothel in Pompeii. Well struck and choice for type with excellent detail. **EXTREMELY FINE. .....$8000-$12,000**

Important North West Company Beaver Token Issued for Western Canada & the United States

CANADA

502 **North West Company. Beaver Token (One Made Beaver), 1820.** Br-925 (R-5); Lr-485 (R-8). Struck in brass. Engrailed edge. Old head of King George III facing right, "TOKEN" above, "1820" below; Reverse: North American beaver standing right on landscape, "NORTH WEST" above, "COMPANY" below. The Northwest Company was one of the most significant companies involved in the North American fur trade during the 18th and 19th centuries. Founded in Montreal in 1779, the North West Company grew to be the biggest competitor to the Hudson Bay Company. This token was issued in 1820, valued at one beaver pelt. The following year the company merged with and into Hudson Bay Company. The tokens are believed to have been struck in Birmingham, England, by John Walker & Co for the Canadian and American market. Normally, these tokens are found very well worn and often corroded having been unearthed in region of the Lower Columbia River and Umpqua River valleys in Oregon.

This newly discovered example comes to us from the American North West, having just recently been sent to PCGS for certification by our firm. Despite having been holed, PCGS has assigned this coin a numeric grade as it is believed that these tokens were issued with holes in them for suspension. Reportedly only one example is known which is not holed, that being the copper example housed in the Bank of Canada collection. Pleasing olive brown surfaces with darker red and brown tones, quite attractive for the VERY RARE type and certainly among the nicer examples known. **PCGS VF-30.** ..... **$10,000-$15,000**

Finest Certified Countermarked Costa Rican 4 Escudos

COSTA RICA

558 **4 Escudos, ND (Decree of December 24, 1841). San Jose Mint.** Fr-2a; KM-29; Gurdian-pg.63, Type VII; Resello de Costa Rica-pg.23. Type-II countermark: Radiant six pointed star, rosette at center all in a 4 mm circle. On a central American Republic 1837-CR-E 4 Escudos applied at the base of the Ceiba tree. According to Jorge Murillo, author of "Historia de las Monedas de Costa Rica", due to the introduction of counterfeit ounce and a half ounce gold coins (8 and 4 Escudos) by Julian Fabrega in Leon, a full investigation was launched in Nicaragua. By the decree of December 24, 1841 it was stated that all coins bearing the seal of the Central American Republic and any foreign coins, no matter what size were to be countermarked. Only the silver coinage that was countermarked has a small circular piece extracted to test the purity and to pay for the work of countermarking.

The only known genuine host coins for the gold issues are the 1837-CR-E 4 Escudos and 1835-CR-F 2 Escudos of which we have been able to track down five specimens of the 4 Escudos, with this piece being a newly discovered sixth example. Of the six examples, we have determined that this is the finest. VERY RARE and very interesting. Sharply struck with virtually full details in the leaves of the Ceiba tree, with only slight signs of wear. The reverse is fully struck up with full details in the face and mountains. Lustrous with light attractive toning. Contermark **AU Details**, host coin **PCGS AU-53 Secure Holder. .....$12,000-$16,000**
